About the course

The Pricoris ISO 22301:2019 Lead Implementer course is a 3-day, live, instructor-led programme. Over 24 hours it teaches you to set up, run and continually improve a Business Continuity Management System (BCMS) and prepare an organisation for its ISO 22301 certification audit. Participants who pass the examination receive the ISO 22301:2019 Lead Implementer certificate, approved by Exemplar Global.

What is ISO 22301?

ISO 22301 is the international standard for Business Continuity Management Systems. It gives organisations of any size a structured way to identify threats, plan resilient responses and recover quickly from disruptive incidents, such as cyber-attacks, IT outages, natural disasters or supplier failures, so that critical activities keep running within agreed timeframes.

Who should attend

- Business continuity and resilience managers
- Risk, compliance and GRC professionals
- IT disaster recovery and operations managers
- Crisis management team members
- ISO consultants and internal auditors
- ISMS managers extending ISO 27001 to continuity

Prerequisites

There is no formal prerequisite. A basic understanding of management systems or risk management is helpful but not required.

Sectors that benefit most

Banking, healthcare, IT and telecom, manufacturing, energy and government.

Course at a glance

Item	Details
Standard	ISO 22301:2019 Security and resilience — Business continuity management systems
Duration	3 days · 24 hours of live, instructor-led training (10:00–18:00 IST)

After the course	Session recordings, BCMS template pack, doubt-clearing sessions, WhatsApp study group
Certificate	ISO 22301:2019 Lead Implementer certificate, approved by Exemplar Global

3-day course agenda

The course follows the life cycle of a BCMS, from scoping to certification readiness, with a practical workshop each day.

DAY 1

BCMS foundations, context and planning

- Principles of business continuity and resilience
- Structure and clauses of ISO 22301:2019
- Related standards: ISO 22313, ISO/TS 22317, ISO 31000, ISO 27001
- Context, interested parties and legal requirements
- Defining the BCMS scope
- Leadership, business continuity policy and roles
- Objectives and planning to achieve them
- Resources, competence, awareness and documentation

Workshop: scope a BCMS for a case-study organisation

DAY 2

Business impact analysis, strategy and plans

- Business impact analysis (BIA) and prioritised activities
- MTPD, RTO, RPO and minimum business continuity objective
- Dependencies: people, premises, technology, information, suppliers
- Risk assessment of disruption and risk treatment
- Business continuity strategies and solutions
- Incident response structure and warning and communication
- Business continuity plans (BCP) and procedures
- Recovery and return to normal operations

Workshop: run a BIA and draft a business continuity plan

DAY 3

Exercising, evaluation and certification readiness

- Exercise programme: walk-through, tabletop, simulation
- Evaluating business continuity documentation and capabilities
- Monitoring, measurement, analysis and evaluation
- Internal audit and management review
- Nonconformity, corrective action and continual improvement
- BCMS implementation roadmap
- Preparing for the Stage 1 and Stage 2 certification audit
- Exam preparation and examination

Workshop: plan an exercise and build an implementation roadmap

Learning outcomes

- 1 Interpret the clauses and requirements of ISO 22301:2019
- 2 Define BCMS scope, policy, roles and objectives
- 3 Conduct a business impact analysis and set recovery objectives
- 4 Assess disruption risk and choose continuity strategies
- 5 Develop, maintain and exercise business continuity plans
- 6 Audit, review and continually improve the BCMS

Examination & certificate

The examination at the end of the course covers ISO 22301 requirements, BCMS planning, business impact analysis and risk assessment, continuity strategies and plans, exercising, and performance evaluation.

Participants who complete the training and pass the examination receive the **ISO 22301:2019 Lead Implementer certificate, approved by Exemplar Global**. Employers can verify certificates at pricoris.com/verify-certificate.

Key terms you will master

BIA

Business impact analysis: how a disruption affects each activity over time

MTPD

Maximum tolerable period of disruption before impacts become unacceptable

RTO

Recovery time objective: when an activity must be resumed

RPO

Recovery point objective: how much data loss is acceptable

MBCO

Minimum business continuity objective: the lowest acceptable service level

BCP

Business continuity plan: documented steps to respond and recover

Your trainer: Sanjay Gore

FIII, CISA, CRISC, CDPSE, CRMA, CPISI · ISO/IEC 27001 and ISO/IEC 42001 Lead Auditor · Independent Director (IICA databank). 20+ years in governance, risk, IT audit and insurance, including IS audit covering BCP/DRP. Delivers ISO programmes in India and internationally.

Included with your course

- 24 hours of live, instructor-led training
- Session recordings for revision
- BCMS template pack (BIA, BCP and more)
- Doubt-clearing sessions and a WhatsApp study group

Reserve your seat

Next batches: 7–14 Nov 2026 (weekends) · 3–5 Dec 2026 · 9–16 Jan 2027 (weekends) · Live virtual · ₹26,500 + GST
